

The Coravin System is a transformational new technology that allows us to pour wine while keeping the cork in the bottle. When the Coravin System is put in place, a thin, hollow needle is inserted through the cork to extract the wine. The bottle is then pressurized with argon, an inert gas that's in the air we breathe. Once the bottle has been pressurized, the wine flows through the needle and pours into your glass. Once your wine is poured, the needle is removed, and the cork reseals itself.

AnQi's proudly pours 6oz glasses of these exclusive wines
